GENERAL INFORMATION

The College year extends over approximately thirty-six weeks and is divided into the Fall Quarter, ending with examinations before Christmas; the Winter Quarter, ending about the middle of March, and the Spring Quarter, ending with Commencement in June.

Before enrolling in any course a student must obtain a card signed by the Treasurer of the College, showing that a satisfactory settlement of his accounts has been made, and by the Dean, showing approval of the subjects selected.

No change of registration involving entrance into a new course shall be permitted after the first week of instruction.

Withdrawal is the voluntary severance by the student of his connection with the college and is indicated on the registration books by a "W." A student may withdraw from any course at any time prior to the last two weeks of the quarter with the consent of his instructor and the Dean, but if the withdrawal is made after the first four weeks of the quarter, and the student's work has not been satisfactory, he will receive an "E" instead of a "W." Students dropping any course or failing to attend any course for which they have registered without officially withdrawing from the same will be given an "E" in that course.

A student withdrawing voluntarily from the College is entitled to honorable dismissal under the following conditions:

1. He must be in good standing with the College, i. e., not liable to dismissal on account of failure, excessive absence or tardiness, or a breach of discipline.
2. He must make written application to the Dean.
3. All financial indebtedness must be settled with the College.

Every student is required to attend the scheduled exercises of his class.

Quarterly and Special Examinations

Examinations shall be held at the close of each quarter in all courses, and at such other times during the quarter as the instructors shall determine. A student absent from a scheduled examination, either through sickness or other unavoidable cause, may take a special examination under the following conditions:

1. He shall obtain a card of authorization from the registrar, upon the payment of the special examination fee, and
2. He shall present the card to his instructor and take the examination at the time designated by the instructor.

Persons attending classes as auditors shall in no case be permitted to take examinations or to obtain credit therefor.

Marking System

The following is the system of grades: A, honor; B, C, intermediate; D, low pass; E, failed; I, incomplete; W, withdraw.

All grades are final except an "incomplete."

An "incomplete," I, is given only in case the student has been in attendance and has done satisfactory work to a time within two weeks of the close of the quarter. To remove the "incomplete" and assure credit, the work must be completed within one month after the beginning of the following quarter, otherwise the course shall be reported with the grade of "E."

Before the removal of an "I," by the completion of the work or a special examination, the student must secure from the registrar a card of authorization, upon the payment of the special examination fee. The card shall be presented to the instructor and the work completed or examination taken at the time or times designated by the instructor.

GRADE POINTS

A value in points is assigned to the several grades as follows: for each hour of grade "A," 4 points; for each hour of "B," 3 points; for each hour of "C," 2 points; for each hour of "D," 1 point. An "I" (Incomplete) and a "W" (Withdrawn) count neither as registered hours nor grade points.

Any student failing in any quarter to make twice as many grade points as registered hours shall be automatically placed on the warned list. A student shall remain on the warned list until his grade points both for the previous quarter and for his entire record are twice as many as his registered hours. Reinstatement of a student dismissed for poor scholarship shall be allowed only on permission of the Dean.

ADMISSION

Testimonials and Credentials

All applicants for admission to the College must present satisfactory testimonials of good moral character. A student entering from another College or institution of collegiate rank, must furnish from such institution (1) a certificate of honorable dismissal; (2) an official transcript of all college credits together with entering high school units.

Candidates for admission to the Freshman class must present entrance credits amounting to fifteen units in acceptable subjects, representing four years of accredited high school work.

A unit is a series of recitations or exercises in a subject given continuously throughout the school year. The number of class exercises required in a week for each unit shall be, in general, five. Double periods are required for laboratory courses. Half units will be accepted only when presented in addition to integral units in the same subject or in half-year subjects which constitute a complete course in themselves, e. g., Solid Geometry. Any two of the biological sciences (Physiology, Botany, Zoology) may be combined into a continuous year's course equal to one unit. Not more than four units in any one subject will be accepted and not less than two units in any language.

Applicants who are not entitled to admission by certificate must pass entrance examinations based on a four-year course amounting to 15 units definitely correlated with the curriculum to which admission is desired. In satisfying entrance requirements by college courses, 10 credits are counted as one unit.

The following list gives the minimum subject requirements for admission into any regular curriculum.

| | | | |
|----------------------|--------------|--------------------------|---------|
| English | 3 units | Laboratory Science | 1 unit |
| Algebra | 1 unit | Foreign Language | 2 units |
| Plane Geometry | 1 unit | Approved Electives | 5 units |
| | History..... | | 2 units |

Among the electives not more than 4 units will be accepted in commercial or vocational subjects combined.

Degrees

The College confers the following Baccalaureate Degrees:

The Bachelor of Arts (A. B.) when the principal sequence is Latin, Philosophy, any other branch in which the student may wish to major or minor. Not less than twenty quarter hours of Latin will be accepted for the A. B. Degree.

Bachelor of Philosophy (Ph. B.) when the principal sequence is in the general cultural subjects of Philosophy, Literature and Education.

Bachelor of Science (B. S.) when the principal sequence is Science and Mathematics.

Requirements for Graduation

1. The completion of 192 quarter hours of work with an average of 2 grade points per quarter hour is required.
2. A Major and Minor to be taken chiefly during the Junior and Senior year.

3. A thesis approved by the Dean.

4. A passing grade in the oral examination in Philosophy and Religion to be taken prior to graduation.

5. At least the Senior year in residence at Seattle College.

The quarter hour is the unit of standard for computing the amount of a student's work. A quarter hour is defined as one lecture, recitation or class exercise, one hour in length per week, for one quarter. Two hours of laboratory work are equivalent to one recitation hour.

Major and Minor

Each student at the beginning of his junior year must arrange his work to center around some subject or department. This department is called his Major. For graduation a student must present at least forty quarter hours in his major field and twenty-five in a minor.

Electives

Courses (a) not taken as prescribed courses, and (b) not included in the student's Major or Minor may be chosen as approved electives to complete the 192 credits required for graduation.

GENERAL STATEMENT

Modern trends in nursing education tend to a steadily increasing demand for nurses with broad educational background and advanced professional preparation, not only to fill positions of educational leadership, but also for intelligent bedside service to the patient and the education of the public in health and prevention of disease. The progress in the development of nursing education on a professional level, with a constantly increasing number of nursing schools seeking college affiliation, the recognized importance of the presence of the nurse in the field of public health, the pressing need for research in the field of nursing education and nursing service are all creating a demand for properly equipped graduate nurses and are evidence of the need of a much broader type of preparation than was formerly considered necessary for the nurse.

The Seattle College has become aware of this need and has assumed the responsibility of setting up a program of nursing leading to the degree of Bachelor of Science in Nursing, which requires six quarters of work in the college and ten quarters at Providence Hospital, an institution which is an integral part of the Department of Nursing Education of Seattle College.

The Seattle College is a fully accredited institution recognized by the Northwestern Association for the Accrediting of Secondary Schools and Colleges, by the National Catholic Educational Association, by the State Department of Education, and by the University of Washington.

The aim of the Department of Nursing Education is not only to prepare well qualified nurses, but to help develop the students in every way possible to make them more useful and accomplished women. Students who have dramatic or musical talent are enabled to continue these interests through the Dramatic and Glee Clubs. Competent directors are in charge of these clubs, which provide entertainment for various occasions. The Physical Education Department sponsors hiking, swimming, tennis, as well as indoor sports. There is a gymnasium and tennis court on the roof of the professional school, and classes in physical education are held there during the school year.

FACULTY

The faculty of the Department of Nursing Education includes the regular staff of Seattle College. The cooperating faculty of the Department includes administrators, teaching supervisors, medical lecturers of the hospital, and other health agencies. All members of the cooperating faculty are approved by the College.

TEACHING FACILITIES

The facilities for teaching include the classrooms and equipment of the College, where the students of nursing receive basic instruction in science and arts together with students from other departments of the College. The general college library is open to students of nursing, as are also the library and reading rooms at the professional school.

The Department of Nursing Education is an independent unit under the Dean of the College, having a Director who is a qualified nurse and a professor. All courses are on an academic basis with full college credit.

In addition to the course leading to a degree, the Seattle College offers affiliations to any accredited schools of nursing in the State of Washington, or in any other states, whose clinical courses are approved by the Department of Nursing Education for lump credit toward the nursing degree under Curriculum A, and credit will also be given for any special courses taken in the College by student nurses, but all requirements must meet the standards of Seattle College before these credits may be applied towards a degree.

The Providence Hospital, established in 1877 by the Sisters of Charity of Providence, has a bed capacity for four hundred patients. The hospital is standardized according to the requirements of the American College of Surgeons, the American Medical Association for Interns, and the Washington State Nurses' Association for the Registration of Nurses. The Department of Nursing has an affiliation for communicable diseases, pediatric nursing, psychiatric nursing, out-patient service, and visiting nursing.

ENTRANCE REQUIREMENTS

All applicants for admission to the College must present satisfactory testimonials of good moral character. A student entering from another college or institution of collegiate rank, must furnish from such institution (1) a certificate of honorable dismissal; (2) an official transcript of all college credits together with entering high school units.

Candidates for admission to the Freshman class must present entrance credits amounting to fifteen units in acceptable subjects, representing four years of accredited high school work.

A unit is a series of recitations or exercises in a subject given continuously throughout the school year. The number of class exercises required in a week for each unit shall be, in general, five. Double periods are required for laboratory courses. Half units will be accepted only when presented in addition to integral units in the same subject or in half-year subjects which constitute a complete course in themselves, e.g., Solid Geometry. Any two of the biological sciences (Physiology, Botany, Zoology) may be combined into a continuous year's course equal to one unit. Not more than four units in any one subject will be accepted and not less than two units in any language.

Applicants who are not entitled to admission by certificate must pass entrance examinations based on a four-year course amounting to fifteen units definitely correlated with the curriculum to which admission is desired. In satisfying entrance requirements by college courses, 10 credits are counted as one unit.

The following list gives the minimum subject requirements for admission into any regular curriculum:

| | | | |
|---------------------|---------|-------------------------|---------|
| English | 3 units | Laboratory Science..... | 1 unit |
| Algebra | 1 unit | Foreign Language | 2 units |
| Plane Geometry..... | 1 unit | Approved Electives..... | 5 units |

Among the electives not more than four units will be accepted in commercial or vocational subjects combined.

| Extension Courses, per quarter hour..... | 2.00 |

Upon recommendation of the faculty of the professional school, the tuition and fees for basic courses will not exceed \$35.00.

One transcript of credits is given free on application. A charge of \$1.00 is made for each additional transcript.

No student is entitled to take examinations or receive a diploma or degree or be furnished with a record of his credits until his financial obligations are satisfactorily arranged.

The student in the Department of Nursing Education must plan to finance her complete course. She must maintain herself and pay tuition and personal expenses during the first six quarters which are spent in the College. While in the professional school for the succeeding ten quarters the student receives maintenance in the nurses' residence, which includes room, board, laundry (uniforms), but she must provide her own uniforms, textbooks, and special supplies. Basic students receive no salary for nursing service, but their college tuition, which continues through their professional experience, is paid from the hospital student fund.

SERVICES

In the professional school students are assigned in turn to the various services which include medical, surgical, gynecological, obstetrical, pediatric and orthopedic nursing, operating room, special diets, psychiatry, communicable disease, out-patient service, and visiting nursing.

TIME ON DUTY

Time on duty, including classes, is 48 hours a week. There may be some irregularity in case of emergency, but the students are expected to meet such situations cheerfully and willingly.

VACATION

Each student is allowed two weeks' vacation each year, the time to be determined by the Educational Director. Absence other than this is not granted except in extreme emergencies.

The Dean of Seattle College and the faculty of the professional school reserve the right to decide the student's fitness for the nursing field. The professional school will not be responsible for any conditions contracted by the student nurse while serving in the various departments. All time lost through illness or otherwise must be made up before the degree is granted.

CURRICULA

Students entering the Department of Nursing Education may take up curricula in one of two main groups:

- I. Basic courses leading to the degree of Bachelor of Science in Nursing: Curricula A and B; Curriculum C (one year entrance requirement).
- II. Course for graduate nurses leading to the degree of Bachelor of Science in Nursing.
