However, if the year be an exact century, it is not a *leap year*, unless the *number of centuries* is exactly divisible by 4 ; for example, 1200 was a *leap year*, but 1300 was not, as 13 is not exactly divisible by 4.

The extra day in *leap year* is given to February, which then has 29 days.

The following lines will help you to remember the number of days in each month :

Thirty days hath September,  
April, June, and November,  
All the rest have thirty-one,  
Save February, which alone  
Hath twenty-eight, and one day more  
We add to it one year in four.
